Your Ultimate Guide: How to Stand Up Paddleboard (SUP) Like a Pro

Dreaming of gliding across glassy water, feeling the gentle sway of the ocean or the peaceful flow of a river beneath your feet? Stand up paddleboarding, or SUP, offers an incredible way to connect with nature, get a fantastic workout, and explore aquatic landscapes like never before. Whether you're a complete beginner or looking to refine your technique, this comprehensive guide will equip you with everything you need to know about how to stand up paddleboard.

SUP is more than just a water sport; it's a lifestyle. It's about

finding balance, both physically and mentally, and immersing yourself in the serenity of the water. From calm lakes to gentle ocean waves, the possibilities are endless. But before you can experience the joy of paddling, you need to master the basics. Let's dive in!

Getting Started: Essential SUP Gear and Setup

Before you even touch the water, having the right equipment is crucial for a safe and enjoyable experience. Think of it as your SUP toolkit. Investing in quality gear will make a world of difference, especially when you're learning the ropes.

Choosing the Right Stand Up Paddleboard

The world of SUP boards can seem a bit overwhelming at first, but don't worry. For beginners, ****all-around SUP boards**** are your best bet. These boards are designed for stability and versatility, making them perfect for learning. Look for a board that is:

1. **Wide:** A wider board (around 30-34 inches) offers more stability, giving you a confident platform to stand on.
2. **Thick:** A thicker board (around 4.75-6 inches) provides better buoyancy and keeps you higher out of the water, reducing the chance of water splashing over the rails.

3. **Long:** While longer boards are faster, for learning, a board around 10-11 feet is a good compromise between maneuverability and stability.

You'll find both ****inflatable SUP boards**** (iSUPs) and ****rigid SUP boards****. Inflatable boards are incredibly convenient for storage and transport, making them a popular choice for many. Rigid boards, on the other hand, often offer a bit more performance but require more storage space and a roof rack for transportation.

The Perfect Paddle

Your paddle is your engine on the water, so it needs to be the right size. A good rule of thumb for sizing your paddle is to stand it up next to you. The top of the paddle shaft should be about 6-8 inches taller than your height. Most paddles are adjustable, which is great for sharing or for fine-tuning your stroke as you progress.

Paddles come in various materials, with aluminum being a budget-friendly option, and carbon fiber offering a lighter, more performance-oriented choice. For beginners, an adjustable aluminum or composite paddle is perfectly adequate.

Don't Forget Your Leash and PFD

Safety first, always! A ****SUP leash**** is a non-negotiable piece of equipment. It attaches your ankle to the tail of your board,

preventing it from drifting away if you fall in. A coiled leash is generally preferred as it stays out of the way when paddling.

A ****Personal Flotation Device (PFD)****, or life jacket, is also highly recommended, especially for beginners or when paddling in open water. Many PFDs designed for paddleboarding are comfortable and allow for a full range of motion.

Inflation and Setup (for Inflatable SUPs)

If you've opted for an inflatable SUP, setting it up is straightforward. You'll need a high-pressure pump (usually included). Connect the pump to the valve on your board and start pumping. It can take a good 10-15 minutes of consistent effort to get the board fully inflated to the recommended pressure (usually 15-18 PSI). Once inflated, attach your fin (usually a single large fin at the tail for stability) and your leash. Easy peasy!

Mastering the Basics: How to Stand Up Paddleboard

Now that you're geared up, it's time for the fun part: getting on the water and learning to paddle!

Launching Your SUP

Find a calm, shallow area to launch from. If you're using an

inflatable, lay it flat on the water's edge. For a rigid board, you might want to wade in a little with it. Start by kneeling on the board.

The Kneeling Start: Your Stable Foundation

Kneeling is your best friend when you're first starting. It provides maximum stability. Position yourself in the middle of the board, with your knees bent and your shins parallel to the board's edges. Place your paddle across the board in front of you, with the blade submerged in the water – this acts as an outrigger for balance. Get a feel for the board's movement under you.

The All-Important Paddle Stroke

This is where the magic happens! Your paddle stroke is designed to propel you forward efficiently. Here's a breakdown:

1. **The Reach:** Extend the paddle forward, reaching as far as you comfortably can without losing your balance.
2. **The Catch:** Submerge the entire blade of the paddle into the water, as close to the front of the board as possible without dipping your knuckles.
3. **The Pull:** Engage your core and pull the paddle straight back through the water. Imagine pulling the water past your feet. Keep your arms relatively straight and use your torso to rotate and generate power.
4. **The Release:** Once the paddle reaches your hip, lift the

blade cleanly out of the water.

Practice this stroke while kneeling. Focus on smooth, consistent movements. Remember to paddle on one side for a few strokes, then switch to the other. This will help you maintain a straight line.

The Transition: Standing Up from Your Knees

This is often the most anticipated and sometimes challenging part for beginners. Here's the safest and most effective way to stand up:

1. **Paddle Placement:** Ensure your paddle is across the board in front of you, with the blade in the water to act as a stabilizer.
2. **Low Stance:** Get into a lunge position. Place one foot flat on the board, where your knees were. Keep the other foot slightly back, with your toes touching the board. Bend your knees deeply – this is key!
3. **Core Engagement:** Tuck your chin and look forward, not down at your feet. Engage your core muscles.
4. **The Rise:** Use your paddle for support. Push off your back foot and rise up smoothly, keeping your knees bent. Imagine standing up straight, but with a slight bend in your knees.
5. **Find Your Balance:** Once you're standing, bring your other foot up to be parallel with your front foot, hip-width apart. Keep your knees bent and your gaze forward.

Don't be discouraged if you wobble or fall – it's all part of the learning process! Most people fall in at some point, and it's usually a gentle splash.

Balancing on Your Feet

Once you're standing, focus on finding your center of gravity. Keep your knees soft, your core engaged, and your gaze fixed on the horizon. Your arms should be slightly out to the sides for balance, like a tightrope walker. Small adjustments will keep you upright. Resist the urge to look down; this often throws you off balance.

Paddling Technique Refinements for Better Performance

Once you've mastered the basics of standing and paddling, you can start to refine your technique for a more efficient and enjoyable experience.

The Proper Standing Stance

Your standing stance is crucial for balance and power. Feet should be hip-width apart, centered on the board. Knees should be slightly bent, ready to absorb any movement from the water. Keep your shoulders relaxed and your back straight but not rigid. Your arms should be loose, with your elbows slightly bent.

Improving Your Paddle Stroke

As you get more comfortable, you'll notice that your initial paddle strokes might be a bit choppy. Aim for longer, smoother strokes. Instead of just pulling the paddle, think about "drawing" the water past your feet. Engage your core and your back muscles for power, not just your arms. This will conserve energy and allow you to paddle for longer distances.

Turning Your SUP

There are two main ways to turn your board:

1. **The Sweep Stroke:** For a wider turn, use a sweeping motion with your paddle. Move the paddle in a wide arc from the front to the back of your board on the side you want to turn towards. For example, to turn left, make a wide sweep on your right side.
2. **The Draw Stroke:** For tighter turns, use the draw stroke. This is like a reverse of the forward stroke, where you pull the water towards the center of the board. To turn right, make a draw stroke on the right side of the board.
3. **The Pivot Turn:** For a quick turn, you can use a pivot turn. Dig your paddle in near the tail of the board and paddle backwards on one side, while pushing forward on the other, effectively spinning the board.

Paddling in Different Conditions

As you gain confidence, you'll want to explore different water conditions. Paddling on a calm lake is very different from navigating small ocean waves or a gentle river current. Always be aware of your surroundings and your skill level. For beginners, sticking to calm, sheltered waters is highly recommended.

Safety First: Essential SUP Safety Tips

Stand up paddleboarding is a fantastic way to enjoy the water, but like any water sport, safety should always be your top priority. Following these guidelines will ensure your adventures are both thrilling and secure.

Always Wear Your Leash and PFD

We've mentioned it before, but it bears repeating: your leash and PFD are your lifelines. Never paddle without them. A leash keeps you connected to your board, and a PFD provides crucial buoyancy if you fall into the water unexpectedly.

Check the Weather and Water Conditions

Before you head out, always check the weather forecast and any local water condition reports. Strong winds, choppy water, or approaching storms can turn a fun paddle into a dangerous

situation. If in doubt, postpone your paddle.

Know Your Limits and Your Environment

Be realistic about your skill level. Don't venture into challenging conditions until you're confident and experienced. Understand the currents, tides, and potential hazards of the area you're paddling in.

Paddle with a Buddy

It's always safer and more enjoyable to paddle with a friend. If something goes wrong, you have someone to help you. Plus, you can share the experience and take photos!

Stay Hydrated and Protected

The sun and wind can be dehydrating, even on cooler days. Bring plenty of water and wear sunscreen, a hat, and sunglasses to protect yourself from the sun's rays. A rash guard can also offer sun protection and prevent chafing.

The Benefits of Stand Up Paddleboarding

Beyond the sheer fun of it, stand up paddleboarding offers a wealth of physical and mental benefits that make it a truly rewarding activity.

A Full-Body Workout

SUP is a fantastic low-impact exercise that engages your entire body. Your core muscles are constantly working to keep you balanced, your arms and shoulders power your paddle stroke, and your legs and glutes help with stability. It's a great way to build strength, endurance, and improve your cardiovascular health.

Improved Balance and Coordination

The inherent need for balance on a wobbly surface like a paddleboard will dramatically improve your proprioception (your body's awareness of its position in space) and overall coordination. This translates to better balance in everyday life too!

Stress Relief and Mental Well-being

There's something incredibly therapeutic about being on the water. The rhythmic motion of paddling, the fresh air, and the natural beauty surrounding you create a sense of calm and mindfulness. SUP can be a powerful tool for reducing stress and improving mental clarity.

Exploring New Perspectives

SUP allows you to access areas you might not be able to reach

by foot or kayak. You can glide over shallow areas, explore hidden coves, and get up close and personal with marine life. It's a unique way to see familiar places from a new vantage point.

Ready to Paddle?

Learning how to stand up paddleboard is an adventure in itself. It requires a little patience, a willingness to embrace the learning curve (and maybe a few splashes!), and a spirit of adventure. By following these tips, you'll be well on your way to enjoying this incredible sport.

So, grab your board, your paddle, and your sense of wonder. The water is waiting. Happy paddling!

Stand-up Paddleboarding: Mastering the Art of Balance and Flow Stand-up paddleboarding, often shortened to SUP, is far more than a recreational pastime—it's a dynamic blend of balance, strength, and mindfulness that connects people with water in a unique and empowering way. At its core, the sport involves standing on a buoyant board and using a paddle to propel yourself across lakes, rivers, and ocean waters. While it may appear simple, mastering the technique requires patience, proper form, and a deep appreciation for the rhythm of movement. Whether you're drawn to SUP for fitness, exploration, or relaxation, understanding how to stand and

paddle effectively is essential to unlocking its full potential. The first step in standing on a paddleboard is finding your center of gravity. Begin by positioning yourself near the board's midpoint, where stability is strongest. Feet should be shoulder-width apart, toes slightly turned outward to enhance balance. As you kneel slightly, bending your knees to lower your body, the board begins to tilt forward. It's crucial to keep your core engaged and your eyes focused ahead, not down at your feet—this visual alignment helps maintain equilibrium. Once balanced, rise slowly to a full upright position, hands resting comfortably on the paddle with shoulders relaxed. This controlled transition from kneeling to standing sets the foundation for smooth, efficient paddling. Paddling itself is a rhythmic, fluid motion that engages both upper and core strength. The paddle should enter the water near the board's bow, dipping just enough to catch water without excessive resistance. A powerful, controlled stroke begins with a broad pull toward your hip, followed by a smooth recovery as the paddle exits behind. Timing and coordination between arms and legs are vital—avoid leaning too far forward or backward, as this disrupts balance. Instead, alternate strokes smoothly, keeping your movements synchronized and controlled. This steady cadence not only propels you forward but also builds endurance and improves overall coordination. Beyond physical benefits, stand-up paddleboarding offers a wide range of applications and advantages. Physically, it provides a low-impact full-body workout that strengthens the

core, arms, shoulders, and legs while improving posture and cardiovascular health. Mentally, the gentle rocking motion and connection with nature foster mindfulness, reduce stress, and enhance focus—many practitioners describe SUP as a meditative experience. Environmentally, it encourages appreciation for natural waterways, promoting responsible recreation and conservation awareness. Whether used for fitness, exploration of coastal trails, or tranquil moments on a lake, SUP adapts seamlessly to diverse lifestyles and goals. Looking to the future, stand-up paddleboarding continues to evolve with technological innovation and growing global interest. Advances in board design, such as wider, more stable configurations and eco-friendly materials, make SUP accessible to beginners and seasoned paddlers alike. Digital platforms now offer immersive tutorials, real-time coaching, and community-driven challenges, expanding learning opportunities worldwide. As awareness of sustainable water use rises, SUP stands as a model of eco-conscious recreation—promoting clean waterways, reduced carbon footprints, and a deeper human connection to nature. For those ready to paddle, the journey begins not just with a board and paddle, but with a commitment to balance, presence, and adventure. Mastering the art of stand-up paddleboarding is a journey of gradual improvement and personal discovery. By embracing its foundational techniques, respecting the balance required, and appreciating the broader benefits, anyone can transform this water-based

activity into a lifelong practice of strength, serenity, and joy.

Mastering the Waves: Your Comprehensive Guide to Standing Up Paddleboarding

Standing up paddleboarding (SUP) has exploded in popularity, transforming from a niche water sport to a mainstream activity enjoyed by millions. Whether you're craving a peaceful glide across a glassy lake, a thrilling ride on ocean swells, or a unique way to explore coastal waterways, SUP offers an accessible and incredibly rewarding experience. But for beginners, the prospect of balancing on a board can seem daunting. Fear not! This detailed, analytical guide will demystify the process of learning how to stand up paddleboard, equipping you with the knowledge and confidence to paddle your way to adventure.

Why Choose Stand Up Paddleboarding?

Before we dive into the "how," let's explore the "why." SUP is more than just a trendy activity; it's a holistic pursuit offering a multitude of benefits:

1. **Full-Body Workout:** SUP engages your core, arms, shoulders, back, and legs, providing an excellent, low-impact cardiovascular and strength-training session.

2. **Connection with Nature:** From observing marine life to enjoying panoramic vistas, SUP offers an unparalleled way to immerse yourself in the natural world. You'll see your surroundings from a fresh perspective, often at eye level with wildlife.
3. **Stress Relief and Mindfulness:** The rhythmic motion of paddling and the serenity of being on the water can be incredibly meditative, helping to reduce stress and improve mental well-being.
4. **Versatility:** SUP isn't limited to calm waters. You can enjoy SUP yoga, fishing, touring, racing, and even whitewater SUP with the right gear and skill level.
5. **Accessibility:** With a bit of instruction and practice, most individuals can learn to stand up paddleboard relatively quickly, regardless of their athletic background.

Essential SUP Gear: What You Need to Get Started

Investing in the right equipment is crucial for a safe and enjoyable SUP experience. While rental options are readily available, owning your gear offers greater flexibility and can be more cost-effective in the long run.

The Paddleboard (SUP Board)

SUP boards come in various shapes and sizes, each suited for

different activities and skill levels. For beginners, stability is paramount. Look for:

1. **Width:** Wider boards (30 inches or more) offer greater stability, making it easier to balance.
2. **Volume:** Higher volume boards (around 150-200 liters) provide more buoyancy, supporting your weight and keeping you higher in the water.
3. **Length:** Shorter boards (around 9-10 feet) are more maneuverable but less stable. Longer boards (11-12 feet) track better and are more stable for touring. A good all-around beginner board is often in the 10-11 foot range.
4. **Construction:**
 1. **Inflatable SUPs (iSUPs):** These are incredibly popular due to their portability, storage convenience, and durability. They are excellent for beginners and those with limited storage space.
 2. **Hard (Composite) SUPs:** Made from materials like epoxy or fiberglass, these boards are generally lighter, stiffer, and offer better performance but are less durable and harder to transport.

The Paddle

A properly sized paddle is essential for efficient paddling. The ideal paddle length is typically shoulder-height when standing, with the blade extending a few inches above your head. Most

modern SUP paddles are adjustable, allowing you to fine-tune the length for different conditions or when sharing with others.

1. **Blade Size:** Smaller blades are generally easier to use for beginners, while larger blades offer more power for experienced paddlers.
2. **Material:** Aluminum shafts are affordable but heavier. Carbon fiber shafts are lighter and stiffer, offering better performance but at a higher cost. Fiberglass falls in between.

The Leash

A SUP leash is a non-negotiable safety item. It attaches to your ankle or calf and to the tail of your board, preventing your board from being swept away if you fall off. This is especially important in open water or areas with currents.

The Personal Flotation Device (PFD) / Life Vest

While not always mandatory depending on local regulations and the body of water, wearing a PFD is highly recommended, especially for beginners. Choose a PFD designed for water sports, offering good mobility and breathability.

Other Useful Accessories

1. **Waterproof Bag:** To keep your phone, keys, and other

essentials dry.

2. **Sunscreen:** Essential for protecting your skin.
3. **Hat and Sunglasses:** For sun protection.
4. **Water Bottle:** Stay hydrated!

Learning the Basics: Your First Steps on the Water

Once you have your gear, it's time to hit the water! The key to learning how to stand up paddleboard is to break down the process into manageable steps and prioritize a controlled environment.

Choosing Your Location

For your first few outings, select a calm, flat-water location. Think of:

1. **Lakes:** Ideal for beginners due to their predictable conditions.
2. **Sheltered Bays:** Offer protection from wind and waves.
3. **Slow-moving Rivers:** Can be good, but be aware of currents.

Avoid windy conditions, choppy water, and strong currents until you've developed some confidence and skill.

Getting Familiar with Your Board

Before you even get in the water, spend some time on your board. Lie it flat on the ground or sand, and practice getting into the paddling position.

The Kneeling Start: Your Foundation

Most beginners find it much easier to start by kneeling on the board. This provides a stable base and allows you to get a feel for the board's balance before attempting to stand.

1. **Positioning:** Place your board in shallow water, about knee-deep, with the fins pointing away from you.
2. **Mounting:** Stand on the board with your feet roughly shoulder-width apart, straddling the center handle or outline of the board.
3. **Kneeling:** Gently lower yourself to your knees. Position your knees directly over the center of the board, one on each side of the board's spine (the imaginary line running down the middle).
4. **Paddle Placement:** Place your paddle across your lap, or to one side, keeping it secure.
5. **Balance:** Focus on keeping your back straight and your core engaged. Look straight ahead, not down at your feet.

Paddling While Kneeling

Once you're comfortable kneeling, practice paddling. This will help you understand how the paddle interacts with the water and how to propel yourself forward.

1. **Grip:** Hold the paddle with one hand on the T-grip (top of the handle) and the other hand further down the shaft.
2. **The Stroke:**
 1. Dip the blade of the paddle into the water on one side of the board, close to your knees.
 2. Sweep the paddle back in a straight line, pulling yourself forward. Keep your arms relatively straight and engage your core and back muscles.
 3. Lift the paddle cleanly out of the water.
 4. Repeat on the other side to maintain a straight course.
3. **Turning:** To turn, paddle on the opposite side of the direction you want to go. For a sharper turn, you can use the paddle like a rudder at the tail of the board.

The Transition to Standing: The Moment of Truth

This is often the most anticipated and sometimes the most challenging part for beginners. Here's a breakdown of the technique:

1. **Positioning:** Start from your kneeling position, ensuring your

paddle is to one side and secure.

2. **Foot Placement:** Bring your feet to where your knees were. Your feet should be shoulder-width apart, parallel, and centered on the board, aligned with the board's spine. Avoid placing them in a staggered or surfer-like stance initially.
3. **The "Surfer's Grab":** Many beginners find it helpful to place their hands on the rails (sides) of the board, near their shoulders, for support.
4. **The Lift:**
 1. Engage your core muscles.
 2. Keeping your back straight and your gaze forward, push off your knees and gently lift yourself to a standing position.
 3. Bend your knees slightly, as if you're sitting in a low chair. This lowers your center of gravity and increases stability.
 4. Avoid looking down; keep your eyes focused on the horizon.
5. **Paddle Support:** Once standing, place your paddle in the water on one side to help maintain balance.

Paddling While Standing

Once you're standing, the paddling technique is similar to kneeling, but you'll have a higher vantage point and a greater range of motion.

1. **Stance:** Maintain a stable, athletic stance with knees slightly

bent. Your feet should be parallel and centered.

2. **The Stroke:**

1. Reach forward with your top hand on the paddle shaft and plant the blade in the water.
2. Engage your core and rotate your torso to pull the paddle through the water in a powerful, controlled stroke.
3. Keep your bottom arm relatively straight and your top arm bent.
4. Exit the paddle cleanly from the water.

3. **Turning:** To turn, paddle on the opposite side of the board.

For sharper turns, you can perform a "sweep stroke" (a large, arcing stroke) or use the paddle as a rudder.

Tips for Success and Overcoming Challenges

Learning to stand up paddleboard is a journey. Here are some tips to make it smoother and more enjoyable:

Embrace the Falls

Falling off is an inevitable part of the learning process. Don't be discouraged! The water is usually soft and forgiving. Learn how to fall safely by letting go of your paddle and aiming to fall away from the board. Re-mounting the board from the water is a skill in itself and can be practiced.

Start Small and Progress Gradually

Don't try to conquer challenging conditions on your first day. Master the basics in calm water before venturing into more demanding environments. As you gain confidence, gradually introduce more chop or mild waves.

Focus on Your Core

A strong core is your best friend on a SUP board. Engaging your abdominal muscles will significantly improve your balance and stability.

Look Ahead, Not Down

Your body naturally follows your gaze. Focusing on the horizon or a distant point helps you maintain balance. Looking down at your feet will almost certainly lead to a wobble and a potential fall.

Listen to Your Body

SUP can be a great workout, but don't overdo it, especially when you're starting. Take breaks, stay hydrated, and be aware of fatigue.

Consider Lessons

Investing in a lesson from a certified SUP instructor can

accelerate your learning curve and ensure you're developing good habits from the start. They can provide personalized feedback and tailored advice.

Practice Regularly

Like any skill, consistency is key. The more you paddle, the more comfortable and proficient you'll become.

Exploring the Possibilities: Beyond the Basics

Once you've mastered the fundamentals of how to stand up paddleboard, a world of aquatic adventures opens up:

SUP for Fitness and Yoga

SUP yoga has gained immense popularity, offering a unique challenge that enhances balance and core strength. SUP fitness classes also provide a full-body workout in a beautiful natural setting.

SUP Touring and Exploration

Explore coastlines, rivers, and lakes at your own pace. SUP touring allows you to access hidden coves, observe wildlife up close, and enjoy the tranquility of remote waterways.

SUP Fishing

The stability of modern SUP boards makes them excellent platforms for fishing. Anglers can silently glide to prime fishing spots and enjoy a unique angling experience.

SUP in Waves

For the more adventurous, catching waves on a SUP board offers an exhilarating experience. This requires specialized boards and more advanced techniques.

Conclusion: Your SUP Journey Awaits

Questions & Answers About how to stand up paddle board

N o	Question	Answer
1	I'm a total beginner, what's the easiest way to get started with SUP?	Start in calm, flat water like a lake or sheltered bay. Rent a beginner-friendly board (wider and thicker) and a paddle. Practice getting up on your knees first, then transition to standing. Focus on keeping your core engaged and your paddle strokes smooth. Most importantly, have fun and don't be afraid to fall in!
2	What gear do I absolutely need to buy for stand up paddleboarding?	For safety and comfort, you'll need a paddleboard (inflatable or rigid), a paddle (adjustable is best), a leash (attaches you to the board), and a PFD (personal flotation device). Sunscreen, a hat, and water are also highly recommended for any outing.
3	How do I choose the right size stand up paddleboard for me?	Board size depends on your weight, skill level, and intended use. Beginners generally benefit from wider and thicker boards for stability. Shorter boards are more maneuverable for surfing, while longer boards are better for touring and speed. Check manufacturer recommendations for weight capacity and dimensions.

4	What are the most common mistakes beginners make on a SUP, and how can I avoid them?	Common mistakes include looking down at the board, not using their core, and gripping the paddle too tightly. To avoid these: look forward, engage your core by squeezing your glutes and abs, and hold the paddle with a relaxed grip. Also, take small, controlled strokes rather than big, jerky ones.
5	Is stand up paddleboarding good exercise? What muscles does it work?	Yes, SUP is a fantastic full-body workout! It primarily engages your core for balance, your back and shoulders for paddling, and your legs and glutes for stability. It's also great for improving balance and cardiovascular health.
6	What's the best way to stay balanced on a stand up paddleboard?	Balance comes from keeping your knees slightly bent, your feet shoulder-width apart, and your gaze focused forward, not down at the board. Engage your core muscles by drawing your belly button towards your spine. Think of it as standing on a very wobbly yoga mat – small, controlled adjustments are key.
